## About This Game

**Virgo Vs The Zodiac** is a sci-fi/fantasy JRPG inspired by the **Mario & Luigi RPG** series and the **Mother RPG** series in which you play as an obsessed villain.

The game features traditional turn-based combat with real-time execution of moves: blocking, countering and timing your attacks carefully as well as predicting your foes' moves is essential to succeed in **Virgo's twisted and unforgiving cosmic quest to bring back the Golden Age**, a period of peace, symmetry and balance, or so she thinks.

In this galaxy where every action means a reaction, you'll play as Virgo, the Holy Queen, often called Dreadful Queen by heretics, bringing mayhem to the Zodiac Realms and leaving a trail of stardust on the way, all to fit her excessively righteous worldview.

## FEATURES

- **Unforgiving timed-actions combat** where all conflicts are lethal unless you protect yourself; precise timed attacks and blocks will bring an end to heresy.
- **Counter-Turn system:** Any attack can be countered by a variety of equippable counter skills.
- **No random encounters:** Battles fought are plot-relevant.
- **Rewards through exploration:** As you delve into the most heretical star clusters of the galaxy, you'll find a vast amount of explorable areas brimming with interactive objects. Many choices that will impact the game can be brought up through world interaction and exploration.

- 
- **Decide your fate with multiple endings.**
  - **Crafting and upgrading a multitude of items shareable between your party members!**
  - **150+ equipment choices**

  - **SHMUP minigame and most importantly, you can also ride on Alpacas!**

**. Sailaway Update V.0.9.028 - New Boat & Steam Workshop support for boat customisation is live!:**

Hello Pioneers!

This update brings two big new features to the world of Sailaway, the first is a brand new boat and the second is integration of

---

Steam Workshop to allow players to create and share their boat customisation with others.

#### New Boat - Nordic Folkboat. **Update No. 4.0 - New Levels!:**

- Added new 10 levels for single player with incredible quests and challenges.
- All levels are optimized and loaded faster.
- Improved game balance.
- Fixed bugs.

#### **. New version uploaded by popular demand:**

By popular demand, this version removes the inverted axis vertical controls and the Lobby that seemed to be confusing players on what to do next.

Thanks to the guys at some of the youtube channels for the more than 165K views and taking the time to go over laughable areas of the game and show how crappy it was (really?), but the take away here is that they really got into it and did an in-depth review of the game, this is the way it should be.

To be fair, inverted controls is the default for 3rd person games and it's the natural way, but for the whiners up there, they're now NON-inverted. A new update will be coming soon with an option to switch between the two.

Another fix is that walking zombies on the train tracks are killed instantly by moving trains; so far, this has been implemented in the main subway station which is the one where you find yourself first.

#### **. Dupe quickfix (1.3.5.0):**

This patch is devoted to a fix for the recently discovered dupe while harnessing a horse to a trade cart. We've included some more changes and fixes into this patch too! 🤖
