A Comparative Analysis of the Effectiveness of Balloon Dilatation Compared to Clinical Decision to Perform Primary Prosthetic Replacement on Failed Carotid Endarterectomy. To compare the effectiveness of balloon dilatation for failed carotid endarterectomy (CEA) with the clinical decision to perform primary prosthetic reconstruction in a single-center cohort.

Retrospective analysis of all CEA procedures between 2005 and 2014 was performed. The primary endpoint was the 30-day stroke/death. Secondary endpoints were the stroke and death rates at 12 and 24 months and the frequency of complications. Risk factors for stroke/death and complications were assessed by univariate and multivariate analysis. During the study period, 300 patients were operated on for symptomatic carotid stenosis. One hundred and seventy-seven CEAs were primary, and 123 were CEAs as a salvage procedure after primary prosthetic replacement. The postoperative stroke/death rate was 6.3%, 5.1%, and 4.5% at 30 days and 12 and 24 months, respectively. The primary CEA group had a significantly lower rate of stroke/death at 12 months (4.0%) compared to the salvage CEA group (17.8%,  $P = 0.002$ ) as well as at 24 months (1.2% vs 13.6%,  $P = 0.049$ ). Primary CEA is the primary option to treat symptomatic carotid stenosis after failed primary prosthetic replacement.Q: Is a Polyfilla shingle mounted to a tongue-and-groove roof a structural member? I have a tongue-and-groove roof with a roof deck and a series of gable vents in the middle. I need to replace the three largest of the four 3' x 4' x 8' R-4 with new shingles and also remove the roof deck and install 3-inch aluminum flashing in the gable vents. Since I plan to replace the roof deck I want to know if the 4' x 8' section that slides into the roof cavity is a structural member and whether it needs to be removed before I do the work. The roof deck extends from the ridge of the roof to the slope below the ridge. I have the same roof on a previous house. The asphalt shingles are in great shape, so I assume that it's in decent condition. I have seen a few questions similar to mine on the site, but I 82157476af
